

ABSTRACT OF THE DISCLOSURE

5 A personalized subtitle system. A personalized subtitle system includes a display device, such as a Heads Up Display (HUD) device, worn or carried by a user in a public venue such as a movie theater, playhouse, or stadium. The user utilizes the display device to select and read captioning or subtitle  
10 information for a public event such as a movie, play, or sporting event. In this way, subtitles in a variety of languages can be supplied for the public event. In another embodiment, the display device is used in conjunction with a conventional subtitle display system, such as a DVD player for  
15 home use. In either embodiment, the user can operate a control panel to select a desired language. Subtitles in the selected language are then displayed to a viewer wearing or using the display device. In this way, a viewer desiring subtitles may have subtitles displayed without disrupting  
20 another viewer's enjoyment of a public venue.
